

January 29, 2024

Dear Ms. Betul Erden,

Based on our talk with you, I write this support letter to indicate that you can have access to Harmony Dallas and Fort Worth interim math data and develop an intervention plan based on your analysis. You can contact related parties to provide your intervention program and discuss different alternatives upon their interests.

I understand that the data you will have access to will remain entirely confidential and may not be provided to anyone outside of your research team without permission from Harmony Public Schools and University of Houston IRB.

Sincerely,

A handwritten signature in black ink, appearing to read "Asahin", with a stylized, cursive script.
